

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Deborah L. MacPherson      Examiner: Susan Rayyan  
Number: 10/803,040      Art Unit: 2167  
Filed: March 18, 2004      Today's Date: December 3, 2007  
Title: **Context Driven Topologies**

Dear Susan Rayyan,

The following items are enclosed in response to the Office Action September 4, 2007:

1. Corrected drawing sheets in compliance with 37 CFR 1.121d. Every sheet is designated "Annotated" and the drawings have been spread out for individual viewing. The drawings themselves have not changed since the original application. 16 printed sheets are inserted between pages 2 and 3 of the numbered pages of the response herein totaling 138 pages. Please note, since I am registered with the EBC including PKI certification, they have indicated I can send TIFF files instead of B/W prints. Due to the unacceptable quality of the existing scans and if granted your permission, I prefer to send electronic copies of the final drawing sheets and photograph provided by the Hirshhorn Museum and Sculpture Garden to be located in my paragraph number 3.14. Please confirm explicitly if electronic files will be allowed for the record copy.
2. Response to claim rejections under 35 USC 101 to explain tangible results, and 35 USC 112 first paragraph and second paragraph to comply with description and enablement requirements. Each instance is addressed in the order presented in the Office Action. The answers to your questions are extracted from the specification with references to my paragraph numbers below to preclude additional inquiries you may have regarding locations. Next, the previously presented and amended claims were put together with the answers and fine tuned to be consistent.
